

Libertyville Township Highway Department Oak Spring Road Bridge Replacement

Public Informational Meeting – September 13, 2016

PROJECT OVERVIEW

The Township Highway Department has secured Federal Funding to assist in the design and construction of a replacement bridge on Oak Spring Road over the Des Plaines River. The existing bridge was constructed in circa 1968. Despite regular maintenance by the Township, the bridge had continued to deteriorate. A number of inspections have been performed and determined that while the bridge is still safe to travel, the next appropriate step is to replace the structure.
