

NORTH TRI-STATE TOLLWAY Bradley Road Bridge Reconstruction

The Bradley Road Bridge carrying traffic over the North Tri-State Tollway (I-94) will close for bridge reconstruction May 30, 2018, through September.

The Illinois Tollway will remove the existing bridge built in the 1950s and build a new, longer and wider bridge with two, 12-foot lanes and 8-foot shoulders.

The full closure of the Bradley Road Bridge is necessary because the bridge is too narrow to accommodate traffic while safely completing the reconstruction work. Up to 4,500 vehicles use the Bradley Road Bridge daily.

Traffic will be detoured using Rockland Road (Illinois Route 176), St. Mary's Road and Town Line Road.
